Ceiling Fan Light Kit Installation Instructions

Please read carefully and save there instructions, as you may need them at a later date. Ceiling fan light kits are only meant to be used with ceiling fans.

Do not install as a light fixture
_____

SAFETY

WARNING: RISK OF ELECTRIC SHOCK.
Disconnect the electrical supply circuit to the fan
before installing light kit
_____

GENERAL

All electrical connections must be in accordance with local codes, ordinances or national electrical codes. If you are unfamiliar with methods of installing electrical wiring,
Secure the services of a qualified electrician. Before starting installation, disconnect the power by turning off the circuit breaker or removing the fuse at fuse box. Turning power off using the fan switch (speed control on/off) is not sufficient to prevent electrical shock.

NOTE: The important safeguards and instructions appearing in the manual are not meant to cover all possible conditions and situations that may occur. It must be understand that common sense, caution and care are factors which cannot be built into any product. These factors must be supplied by the person(s) installing this unit.

CAUTION:

To reduce the risk of electrical shock, disconnect the electrical supply circuit to the fan before installing light kit.

ASSEMBLY and INSTALLATION

Tool Required: Screwdriver

For Type A: Center Nipple Attachment (see Fig. 1/Fig 2/Fig. 3)
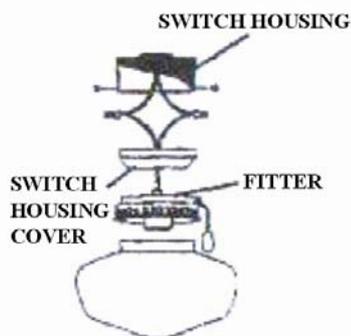

1. Remove the switch housing cover from the fan by unscrewing the three screws.
2. Remove the threaded plug from the center of this cover by unscrewing it. You may discard this piece or keep it for future use.
3. Attach the cover to fitter and feed the kit wires (black and white) through the hole of the cover. Screw on the cover and secure it to the fitter. Be sure it is tight enough to prevent light kit from vibrating loose.
4. Locate two single wires in switch housing. White (gray on some models) and blue (red on some models) labeled "for light".
5. Connect wires from ceiling fan to wires from light kits using wire nuts provided.
   -White (gray) to white
   -Blue (red) to black
   For secure connection, put electrical tape around wire nuts.
6. Carefully push all wires back into switch housing of fan. Then replace the cover with original screws.
7. Install 60 watt max. (bulbs not provided) and glass globe or shade(s). Gently tighten three thumb screws provided. Do not over tighten.
    Some units may allow up to 100 watt max. bulb (not provided) on your single light kit.
8. Restore the power and your light kit is ready for operation
9. If light kit does not work, turn off the electricity and lower either the canopy or the decorative housing of your ceiling fan to make sure the blue wire is connected to black supply wire. Please refer to the electrical connections section of the ceiling fan instruction manual.
